EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dennis Danella on November 30, 2005.

The application has been amended as follows:

In claim 26, line 14, after "hot zone" insert ", wherein said hot zone is distinct from said reformer zone".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the instant claims are allowable over the prior art of record, because the prior art is silent to a method of producing electricity at an auxiliary power unit in a vehicle comprising: sensing a reformer zone temperature at a reformer zone, wherein the fuel reformer is positioned within said reformer zone; sensing a hot zone temperature at a hot zone, wherein the fuel cell stack is positioned within said

hot zone; and adding a second process air flow to the hot zone if the temperature rises above a second selected temperature range.

The prior art, such as Armstrong teaches a fuel cell stack in a temperature zone, but is silent to adding a second process air flow to the hot zone if the temperature rises above a second selected temperature range. Therefore, the instant claims are patentably distinct from Armstrong.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
